

Melvin Rohit James

Bengaluru, KA | melvin.rohit.james@gmail.com | [LinkedIn](#) | [Github](#) | 9380216557

Skills

Technical Skills: WireShark, Nmap, BurpSuite, Docker, ZAP, HTML, CSS, Javascript, Java, Python, Git, GitHub, CI/CD

Professional Skills: Microsoft Word, Microsoft Excel, Microsoft PowerPoint, Google Docs, Presentation, Collaboration, Logical Reasoning

Projects

Sentiment-Analysis (<https://github.com/melvinjames1/Sentiment-Analysis>)

Developed a Python-based sentiment analysis model leveraging logistic regression and TF-IDF vectorization to classify text sentiment. The tool processes and analyzes large-scale textual data, such as customer reviews and social media posts, providing automated sentiment classification and valuable insights for data-driven decision-making.

WAVS(Web Application Vulnerability Scanner) (<https://github.com/melvinjames1/WAVS>)

Developed a Web Application Vulnerability Scanner tool that identifies security vulnerabilities in web applications by automating the testing process. The tool helps detect common security issues, improving the efficiency and reliability of vulnerability assessment in web systems.

Experience

Kristu Jayanti Software Development Centre **Front-End Lead (15/06/2024-15/07/2024)**

- Built KJ Well-Being Centre website with Angular and Tailwind CSS for a responsive UI.
- Developed Angular routing for seamless navigation.
- Integrated calendar for session scheduling with "Book a Session" feature.
- Added Auth Guard for secure access control.

Education

Christ University **MSc Artificial Intelligence & Cybersecurity (2025-2027)**

MSc in Artificial Intelligence & Cyber Security with focus on AI, Machine Learning, Web Security, and Network Security. Strong foundation in intelligent systems and secure computing.

Kristu Jayanti College (Autonomous) **BCA (2022-2025)**

CGPA: 7.77

BCA Graduate from Kristu Jayanti University with skills in software engineering, DSA, Git/GitHub, and C, Java, and Python. Worked on a scholarly project, strengthening coding and problem-solving skills.

Certification

Infosys Network Fundamentals: Earned a Network Fundamentals Certification from Infosys, demonstrating a strong understanding of networking concepts, protocols, and infrastructure. This certification covers key topics such as network architecture, IP addressing, routing, switching, and security principles, equipping me with essential skills for managing and troubleshooting network systems efficiently.

Deloitte Cyber Job Simulation: Earned a Cyber Job Simulation Certificate from Deloitte through Forage, demonstrating practical exposure to cybersecurity concepts and real-world problem-solving tasks. The program covered key areas such as identifying cybersecurity risks, understanding security workflows, and applying foundational cyber security principles used in industry environments.
